DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and apparatus for detecting fraudulent attempt to obtain an IP address for network communication. Each independent claim identifies the uniquely distinct features of "monitoring a communications session between a device on a network which uses MAC addresses with a server responsible for assigning IP addresses to detect assignment of an IP address corresponding to a MAC address provided in a data portion of a message from said device; and upon detecting assignment of an IP address corresponding to a MAC address provided in a data portion of said message, creating an entry in an address resolution table associating an assigned IP address with said MAC address provided in the data portion of said message".

The closest prior art, Hama (US 20040202171); discloses an edge router used in establishing a VPN between networked devices fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
